

# Spooky Division Quotient Cards Quotients 1-12

Strategy: Because there are only 12 quotients and 16 squares, some quotients will be repeated. Only allow 1 bingo chip per equation, but allow them to choose which quotient to pick.

**Spooky Division  
Equation Cards  
Quotients 1-12**

**Strategy: Give students time to calculate and write the quotients of each equation first. Because there is more than one equation that is equal to a single quotient, have students place only 1 bingo chip for each quotient called.**
