

Subtracting from Ten

Name _____

Roll	Mark with an X	Number Sentence
5		$10 - 5 = 5$
		
		
		
		
		
		
		
		
		

Teacher Notes

For this activity you will need number cubes for each student. Students will roll the number cube and write the number in the “Roll” column. They will then cross out the number of animals. Finally they will write the number sentence in the third column. If you happen to have 10 sided di, then that works great as well.
